

CORNER LOT REMINDERS

Jimmy Arroyo – Public Works Director

Driving through our beautiful community of Hollywood Park can be a joy as well as a stressful task. Some hazards faced by our friends and neighbors include pedestrians walking or running, bicyclist, deer trotting across the roadways, and of course the other drivers. To help make the drive a little less stressful, we would like to remind our residents on the corner lots of our roadways of a few items contained in the City Code Book. As stated in Section 5-398 (c), "On a corner lot, no fence, vegetation, or other obstruction whose height is greater than twenty four (24) inches, or which blocks a motorist's view of oncoming traffic shall be permitted." Secondly, tree branches must be trimmed a minimum 6' from the ground. Those residents, by abiding by this Code and keeping those corner lots clean, help ensure a safe driving environment in our community. The illustration below depicts the distances and areas that need to remain clear improving visibility for the drivers in our community.

As a side note, those residents who live along our storm water drains please make sure no brush or other trash finds its way over your fences and into the drains. This will keep the drains flowing smoothly avoiding the possibility of property damage due to the back up of water caused by the debris clogging the drains. All City Ordinances are available for review at City Hall during operating hours.
